## Learning Opportunity

The creation and use of effective assessment creates a culture of learning where students are engaged and invested in their own success. These customized days will focus on improving current assessment practices and deepening participants' understanding of designing and using common assessments. Participants will learn how to effectively analyze and utilize assessment data regarding systems of support and interventions.

## Presenters

**Katie White**

Katie White is an author and independent educational consultant in addition to being an Assessment and RtI Associate for Solution Tree. With more than 30 years of experience in education, she has been a system leader, an administrator, a learning coach, and a K–12 classroom teacher and online teacher.

Katie was an integral part of her school division's multiyear journey through renewed curricula and standards/outcome-based assessment and reporting. Through her work at the system level, she has developed an integrated understanding of the relationships between learning, curriculum, assessment, instruction, environment, data, Response to Intervention, resource deployment, and system strategic planning. Her work with educators supports both a holistic understanding of learners and how they interact with our school systems alongside an in-depth refinement of practices that support teaching and learning in classrooms. Her focus is on helping educators develop a personalized understanding of the connections between curriculum, assessment, and instruction through a growth in leadership, confidence, and understanding.

To see the work of Katie and some of her assessment colleagues, visit the Solution Tree website [allthingsassessment.info](https://allthingsassessment.info)
