### Learning Opportunity

Did you know ChatGPT 5 is now built into **Microsoft Copilot**, bringing powerful new AI features directly into Word, Outlook, Teams, Excel, and PowerPoint all to one easy to use interface.

Join Lethbridge School Division for an afternoon session with a **Microsoft expert** exploring how the **paid version of Copilot** can do when securely connected to our organizational data. Attendees will learn how Copilot can build agendas, draft content, analyze data, and improve productivity safely and efficiently.

Microsoft Copilot for Microsoft 365 is **available for schools to purchase** for staff and students and is **currently the only approved large language model** for use within the division. Whether you are considering purchasing it for the 2026/27 school year or have already purchased it, this session will be a great opportunity to see what you may have been missing.

**Learn what Copilot can really do—and why it matters for teaching, administration and students.**
